

SHEENA HEASLIP

Age: 33 Profession: Brand Marketing Manager at Diageo

About two years ago, I discovered that I have significant hearing loss in both ears. I found some environments very challenging and strained to hear everything when I needed to.

I was probably in denial for a time in terms of needing hearing aids. Hearing loss runs in our family and I figured I would just get by with a combination of lip reading, pretending to hear when I didn't and straining at meetings.

I met audiologist Ann Kelly and through her, discovered Lyric, a tiny device that sits in the ear canal for two-three months at a time. It is completely invisible. I get the benefit of better hearing 24/7, with no maintenance nor any need to change batteries.

Every two months I go back to Ann Kelly for a quick visit to get the device replaced.

Lyric has absolutely changed my life for the better: the sound quality is superb.

I hardly notice that I have any device at all, it is like I don't have any hearing loss. Work and social life is so much more enjoyable: even eavesdropping has become a newfound hobby! Nobody notices that I wear a device as you can't see it and I can't feel it.

Ann Kelly and her team are incredible; professional, warm, engaging, informative and nothing but accommodating to your needs. The practice is on Leeson Street and the service provided, from the initial hearing test to finding the right device and arranging appointments to suit your diary, is an exceptionally rewarding experience.

LYRIC IS AVAILABLE AT:
85 Upper Leeson Street, Dublin 4
01 668 44 38
